EVELIA LORENA COSS NAVARRETE

Postdoctoral fellowship at Laboratorio Internacional de Investigacion Sobre el Genoma Humano (LIIGH)- UNAM | Data science | Bioinformatics | Autoimmune diseases | Machine Learning | Statistics | Web developing

PROFESSIONAL EXPERIENCE

Current | 2026

Adjunct Professor – Bioinformatics and Statistics II

ENES-UNAM — Queretaro, Mexico

- Undergraduate Program in Genomic Sciences, National Autonomous University of Mexico (UNAM) February 3, 2026 – May 28, 2026
- Designed and delivered lectures, practical exercises, and assessments to strengthen students' skills in data analysis, reproducibility, and bioinformatics tools.

Current | 2026

Postdoctoral Fellowship

LIIGH-UNAM — Queretaro, Mexico

- Developing an R package to analyze published gene expression datasets on dendritic cell tolerance dysfunction in women with systemic lupus erythematosus, enabling reproducible and scalable data workflows.
- Building an interactive RShiny application to visualize patient-level and cohort-level data, supporting transparent reporting and stakeholder engagement.
- Designed data pipelines and visualization tools to translate complex genomic information into actionable insights for research and clinical contexts.

2026 | 2023

Postdoctoral Fellowship

LIIGH-UNAM — Queretaro, Mexico

- Contributed to Project JAGUAR, an international initiative managing health and genomic data across Latin America. Coordinated stakeholder communication, streamlined data collection processes, and supported regional teams with training and reporting.
- Developed reproducible data workflows and visualization tools to communicate complex results to diverse stakeholders.

CONTACT

EveliaCoss
EveliaCoss
Evelia Lorena Coss-Navarrete

TECHNICAL SKILLS

Expertise: R and Rstudio, Python, Bash, SQL, AWK, markdown/Rmarkdown
Familiarity: Git/Github, python, HTML, CSS

LANGUAGES

Spanish - Native
English - Advanced

SOFT SKILLS

Clear communication
Collaborative leadership
Analytical problem-solving
Adaptability
Analytical Thinking
Community Engagement

EDUCATION

2023

Certified Instructor

The Carpentries

- Member and instructor at The Carpentries, an international organization teaching data science and reproducible research skills. Supported training initiatives to empower researchers with computational tools and collaborative workflows.
- Web page: https://carpentries.org/

2023 | 2018

PhD, Plant Biotechnology

Centro de Investigacion y de Estudios Avanzados del IPN (Cinvestav), UGA-Langebio

Guanajuato, Mexico

- Dr. Selene Fernandez Valverde
- Thesis: Identification and characterization of conserved long non-coding RNAs in Brassicaceae.
- Grade: 9.3/10. First person to graduate from the generation.

2018 | 2016

M. Sc., Plant Biotechnology

Centro de Investigacion y de Estudios Avanzados del IPN (Cinvestav), UGA-Langebio

Guanajuato, Mexico

- Dr. Raul Alvarez Venegas and Dr. Stefan de Folter
- Thesis: Effect of priming activation on bean nodule development and its relationship against Pseudomonas syringae pv. phaseolicola.
- Grade: 9.4/10. Second person to graduate from the generation.

2016 | 2012

B.Sc.,Biotechnology Engineering

Universidad Politecnica de Sinaloa (UPSIN)

Sinaloa, Mexico

- Dr. Raul Alvarez Venegas
- Thesis: Functional analysis of putative trithorax-group histone methyltransferases in common bean (Phaseolus vulgaris) during nodulation.
- Grade: 9.6/10.

PROFESSIONAL AFFILIATIONS

Current | 2024

ISCB RSG-Mexico

Membership ID: 41317

- Project coordinator at ISCB RSG-Mexico, supporting initiatives to develop bioinformatics education for Mexican students. Managed regional projects, facilitated stakeholder engagement, and promoted data literacy across academic and professional communities.
- Web page: https://rsg-mexico.iscbsc.org/

Current | 2023

Comunidad de Desarrolladores de Software en Bioinformatica (CDSB)

Instructor and helper

- Active member contributing to collaborative software development and training initiatives in bioinformatics across Latin America. Supported community-driven projects, reproducible workflows, and open-source tools to strengthen regional capacity in data science and computational biology.
- Github: https://github.com/ComunidadBioInfo/cdsb2023
- Web page: https://comunidadbioinfo.github.io/es/authors/eveliacoss/

Current | 2023

Red iberoamericana de inteligencia artificial para big biodata (RiaBio)

- Member contributing to regional initiatives in artificial intelligence and big data for biological research. Supported collaborative projects across Ibero-America, promoting innovation in data-driven solutions and cross-border knowledge exchange.
- Web page: https://www.cyted.org/web_redes.php?id_rede=501

Current | 2022

R-Ladies, Morelia

Founding Member

- Active member supporting diversity and inclusion in data science and programming. Contributed to community initiatives promoting R-based workflows, mentoring students, and fostering collaborative learning environments in bioinformatics and data analysis.
- Github: https://r-ladies-morelia.github.io/
- Web page: https://r-ladies-morelia.github.io/project/

HONORS

Current | 2026

Posdoctoral Fellowship, CONACYT

Award period: Feb 1, 2026 – Jan 31, 2029

- Project: Genetic Regulation Mechanisms in Systemic Lupus Erythematosus
- Awarded fellowship under Procedimiento de Renovación 2025 de Estancias Posdoctorales por México.
- Continued research on genetic regulation mechanisms in systemic lupus erythematosus, strengthening reproducible pipelines and genomic data analysis.

2028 | 2025

Candidate – Sistema Nacional de Investigadores (SNII), Mexico

Award period: Jan 1, 2025 – Dec 31, 2028

- Recognized as a candidate for Mexico's National System of Researchers, highlighting academic excellence, contributions to bioinformatics, and potential for impactful scientific leadership.

2026 | 2024

Posdoctoral Fellowship, CONACYT

Award period: Feb 1, 2024 – Jan 31, 2026

- Project: Genetic Regulation Mechanisms in Systemic Lupus Erythematosus
- Awarded fellowship under Estancias Posdoctorales por México, Call 2023(1).
- Conducted research on genetic regulation mechanisms in systemic lupus erythematosus, focusing on reproducible pipelines and genomic data analysis.

2025

ISCB Funding proposal. 2025, RSG Funding Program 2025 (RSG Mexico)

Regional Student Groups

- Open-Source Enablers: Infrastructure, Good Practices & Reproducibility for students and young researchers in Bioinformatics in Mexico
- https://docs.google.com/document/d/169Wuwo4OQZ59-mLiqWFQFc3GexFkEDeekVdSBcQ1S9I/edit?usp=sharing

2025

First Prize - CAMDA (Critical Assessment of Massive Data Analysis) 2025

Liverpool, England

- Title: A Hybrid Pipeline for Feature Reduction, and Ordinal Classification to Predict Antimicrobial Resistance from Genetic Profiles
- Cleaned and preprocessed biological datasets, performed genome assembly, and structured analytical pipelines to ensure reproducible workflows.
- Prepared data for machine learning models by contributing to variable selection and feature engineering to optimize predictive performance.

2022 | 2018

PhD Fellowship, CONACYT

2018 | 2016

MsC. Fellowship, CONACYT

Made with the R package pagedown.

The source code is available at EveliaCoss/CV and is powered by nstrayer/cv.

Last updated on 2026-03-24.
